Introduction

As an Ofsted registered childcare provider we meet the statutory requirements of the Early Years Foundation Stage (EYFS 2014) as well as legislation Equality and Human Rights Commission and United Nations Convention on the Rights of the Child (1992). To this end, we have developed a policy that sets out how we will respond if a child, parent or member of staff become ill at our setting. This policy meets the EYFS specific requirements 'Providers must have procedures for instances in which a child receives minor injuries or becomes ill whilst on the premises'; 'If someone on the premises contracts a notifiable disease, the Local Health Protection Unit will be able to provide advice on any action or precautions that need to be taken'.

Policy

It is our policy to keep children safe when they are in our care, promote good health and take necessary steps to prevent the spread of infection within our childcare setting.

If there is a child in our setting who becomes ill whilst in our care, or whom we believe has an infectious illness or disease (for example vomiting or diarrhoea) we will;

- Contact the parents as agreed to arrange for the immediate collection of the child
- Ensure the child is excluded from our setting until they have been well for **48 hours**, in accordance with Health Authority guidelines.

If a parent becomes ill, we will take every effort to make them comfortable in a safe place, and call for someone to collect them and take them home. If we deem a child, parent or member of staff is very ill we will call an ambulance and a member of staff will accompany them to the hospital. If a parent is ill, we will follow the procedure for 'If a child is not collected from our setting' and contact the people on the child's contact form. A member of staff will stay with the child until they are collected by a responsible adult.

If a member of staff becomes ill, we will take every effort to make them comfortable in a safe place, and call for someone to collect them and take them home. We will call in extra staff if necessary to care for the remaining children in the setting. We will ensure that the staff ratios are adhered to as quickly as possible. We have an arrangement with school, that a member of school staff will step in temporarily to ensure the safe running of the club.

If we believe a child in our setting is suffering from a notifiable disease, identified as such in the Public Health (Infectious Diseases) Regulations 1988, we will act on advice given by the Health Protection Agency (details of which can be found at www.hpa.org.uk) and inform Ofsted of any action taken.

Procedure

We will make parents aware of our sickness exclusion policy and keep a record of the arrangements for the exclusion of a child should they become ill whilst in our setting. In accordance with the contract agreed with parents we expect to be paid for the child's place even if they are excluded from our setting due to an illness or infectious disease.

We will inform the parents of the other children in my setting if a child we care for has a diagnosed infectious disease. We will ensure all adults and children in our setting are aware of good hand-washing procedures, before eating or handling food and after using the toilet.

We ensure there is a supply of tissues available for children. We will also provide children with disposable wipes to clean up before and after meals. We will immediately clean up any spillage of body fluids using a disposable cloth and gloves.

We do not have any animals on the premises.

Conclusion

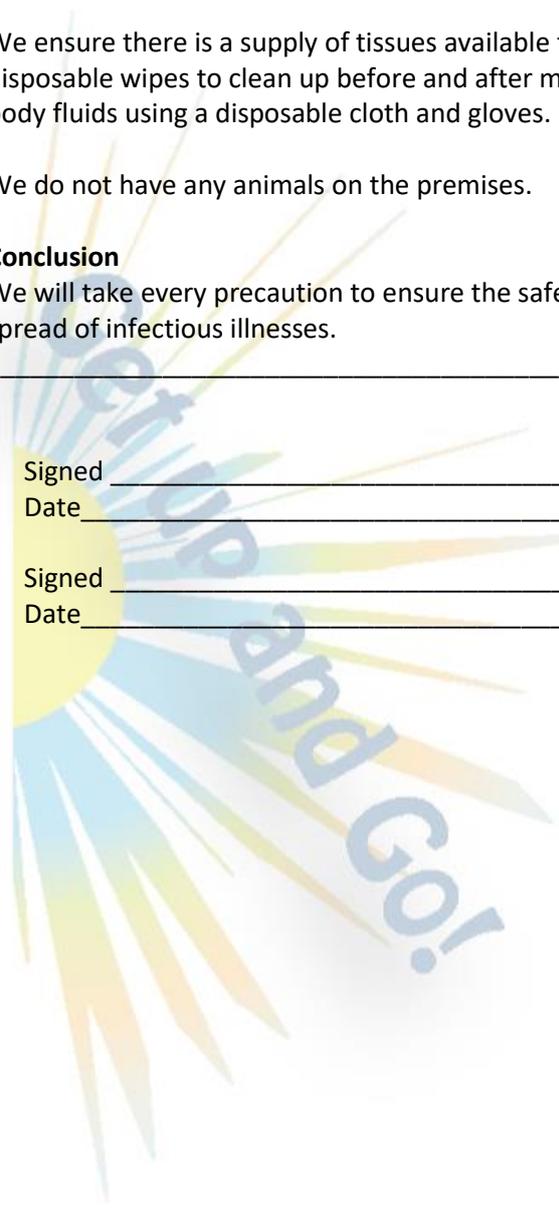

We will take every precaution to ensure the safety of children whilst in our care; this includes the spread of infectious illnesses.
